**Thursday 7 January 2021**

Morning (Time: 1 hour 30 minutes)

Paper Reference **WMA14/01**

**Mathematics**

**International Advanced Subsidiary/Advanced Level**  
**Pure Mathematics P4**

**You must have:**

Mathematical Formulae and Statistical Tables (Lilac), calculator

Total Marks

**Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.**

### Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

### Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 10 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

### Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

Question 1 continued

Lined area for writing the answer to Question 1.

(Total 7 marks)

Q1

A diagram of a parallelogram with vertices labeled A, B, C, and D. Vertex A is at the bottom-left, B is at the top-left, C is at the top-right, and D is at the bottom-right. The sides AB and DC are parallel, and the sides AD and BC are parallel.

Question 4 continued

Handwriting practice area with 28 horizontal lines.

(Total 7 marks)

Q4

5. In this question you should show all stages of your working.  
Solutions relying on calculator technology are not acceptable.

Using the substitution  $u = 3 + \sqrt{2x - 1}$  find the exact value of

$$\int_1^{13} \frac{4}{3 + \sqrt{2x - 1}} dx$$

giving your answer in the form  $p + q \ln 2$ , where  $p$  and  $q$  are integers to be found.

Question 7 continued

Lined area for writing the answer to Question 7.

(Total 7 marks)

Q7

8. With respect to a fixed origin  $O$ , the lines  $l_1$  and  $l_2$  are given by the equations

$$l_1 : \mathbf{r} = \begin{pmatrix} -1 \\ 5 \\ 4 \end{pmatrix} + \lambda \begin{pmatrix} 2 \\ -1 \\ 5 \end{pmatrix} \quad l_2 : \mathbf{r} = \begin{pmatrix} 2 \\ -2 \\ -5 \end{pmatrix} + \mu \begin{pmatrix} 4 \\ -3 \\ b \end{pmatrix}$$

where  $\lambda$  and  $\mu$  are scalar parameters and  $b$  is a constant.

Prove that for all values of  $b \neq 7$ , the lines  $l_1$  and  $l_2$  are skew.
